

School Bus Number Order 0-20

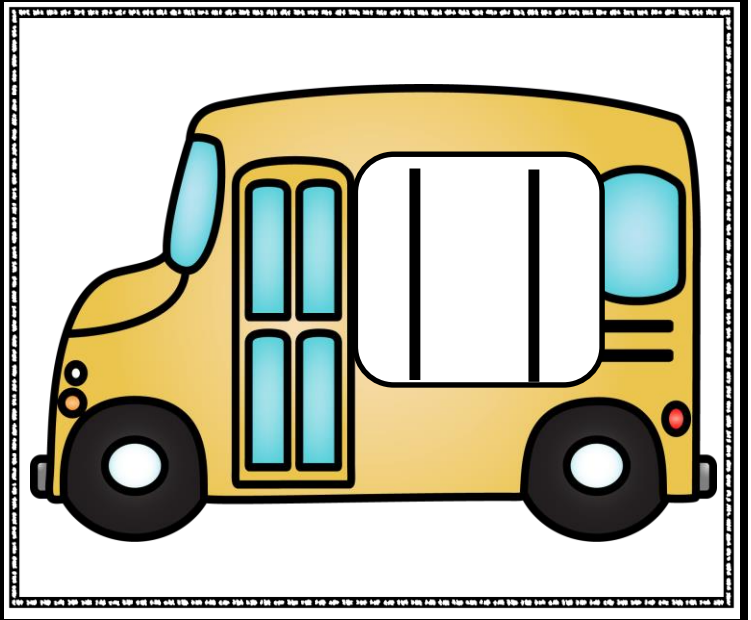

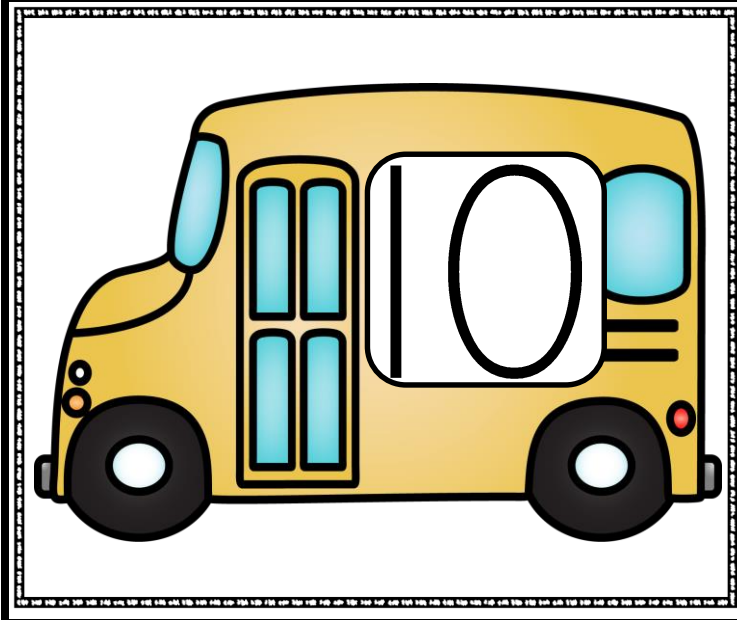

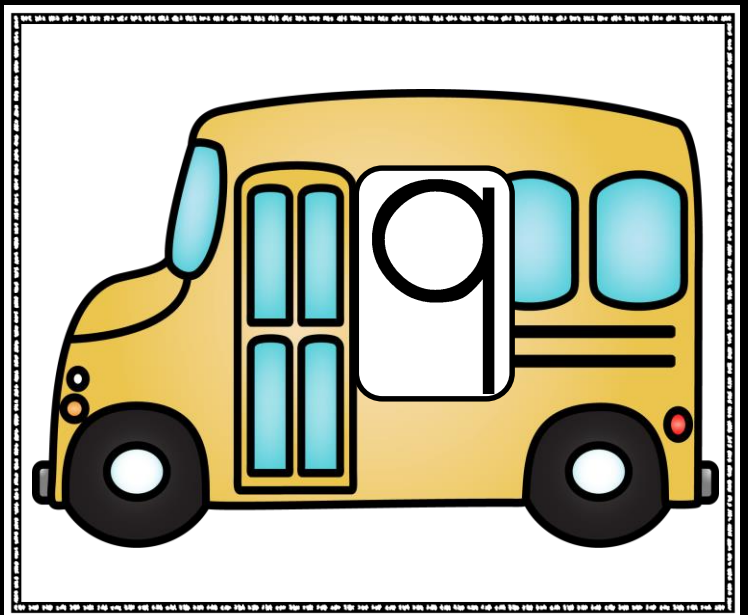

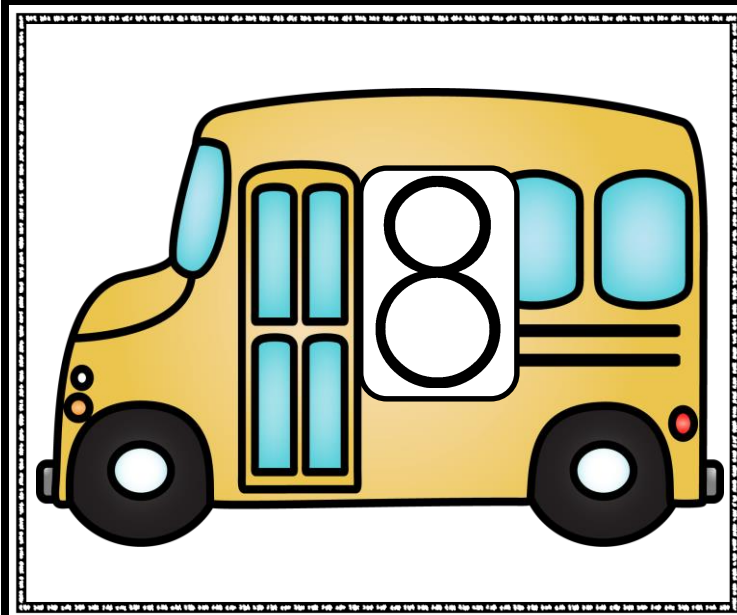

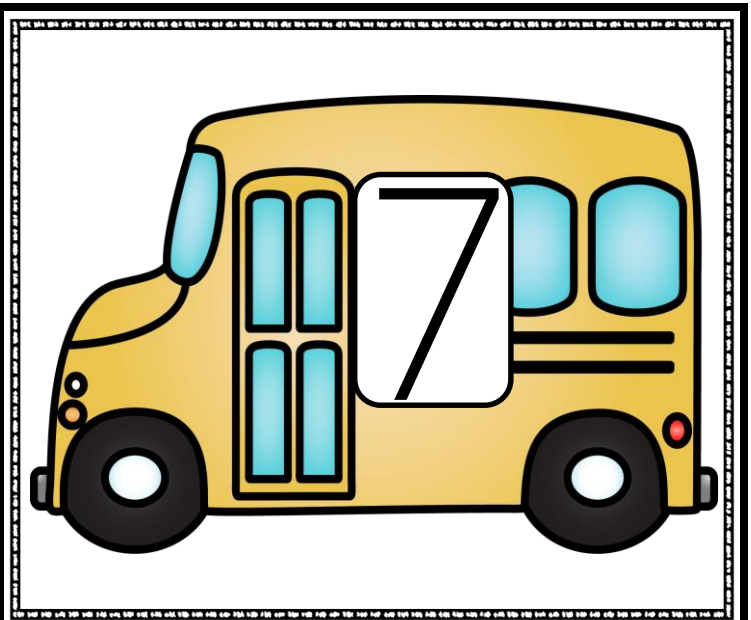

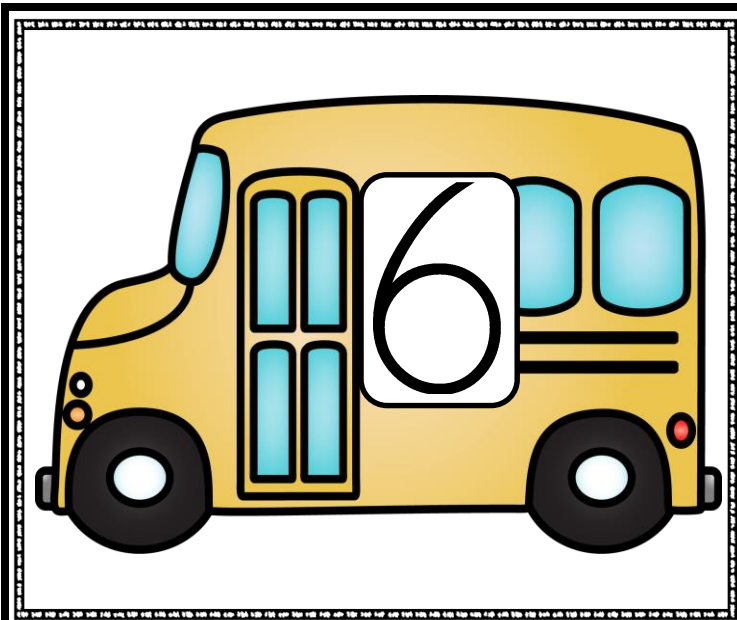

Center plus cut and paste
follow-up activity

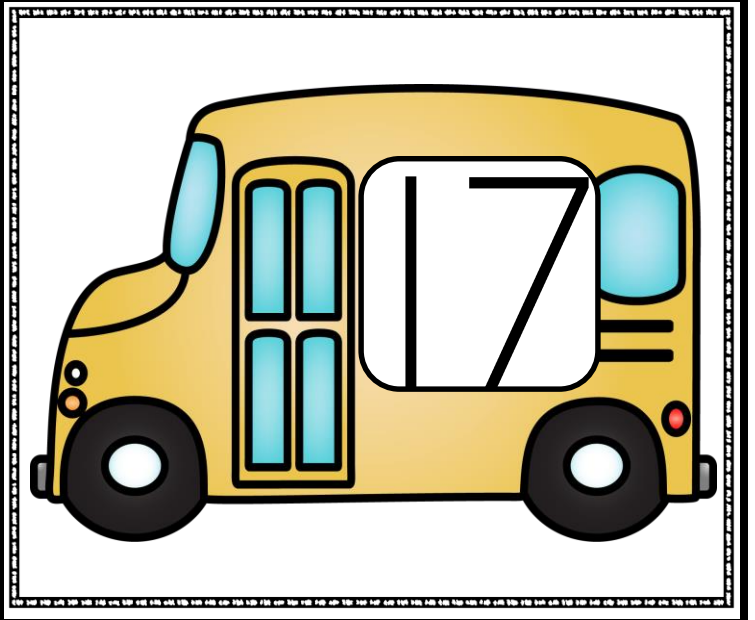

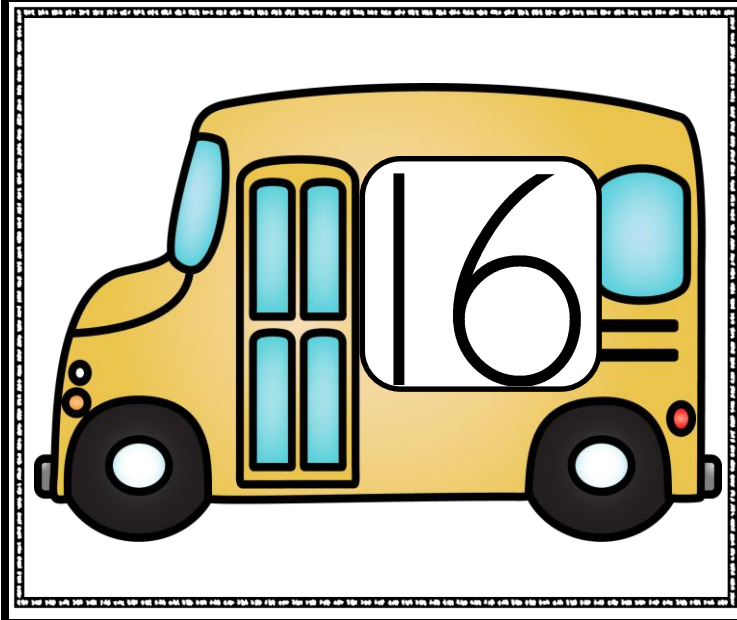

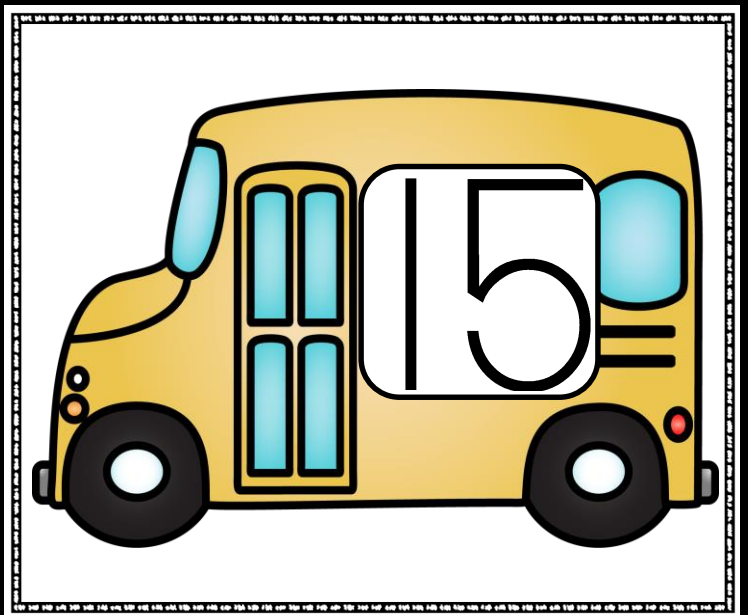

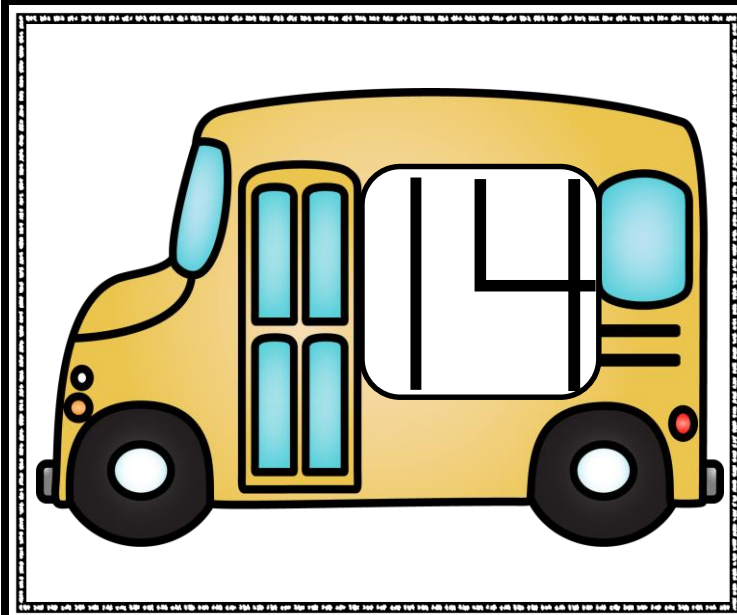

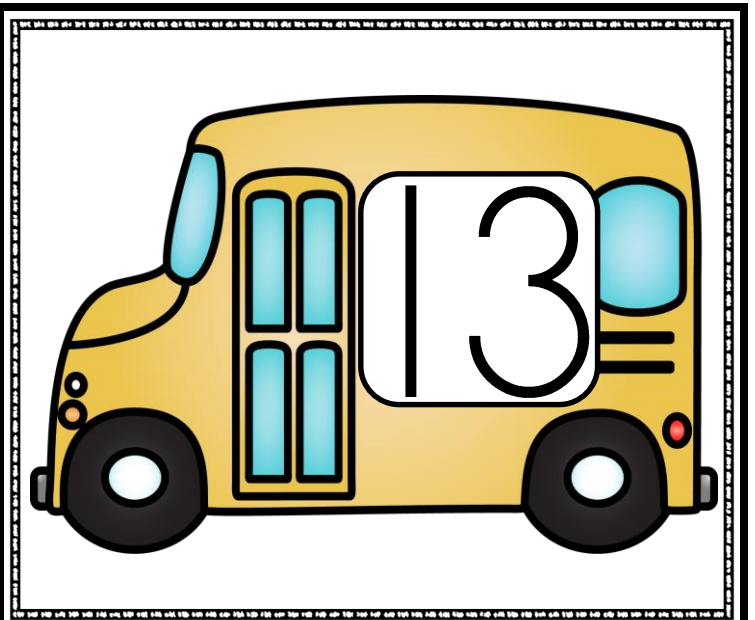

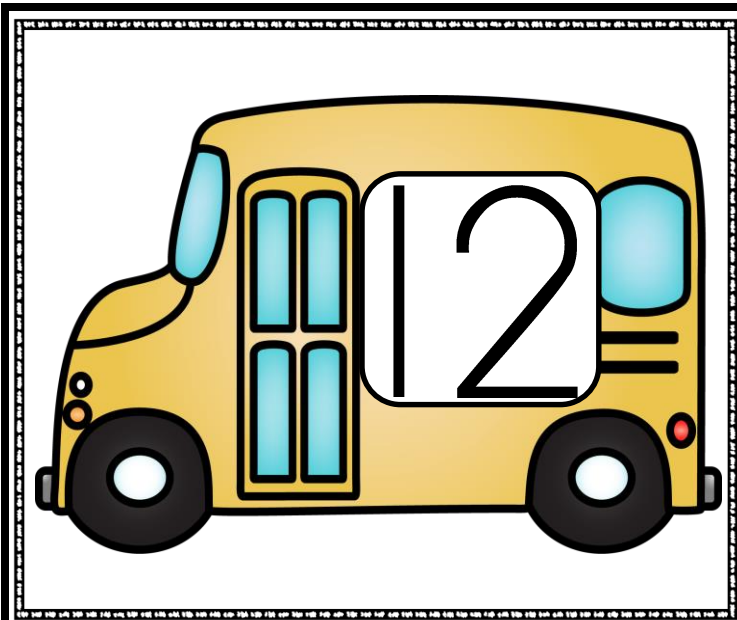

Graphics by [Whimsy Clips](#) and [Ashley Hughes](#)

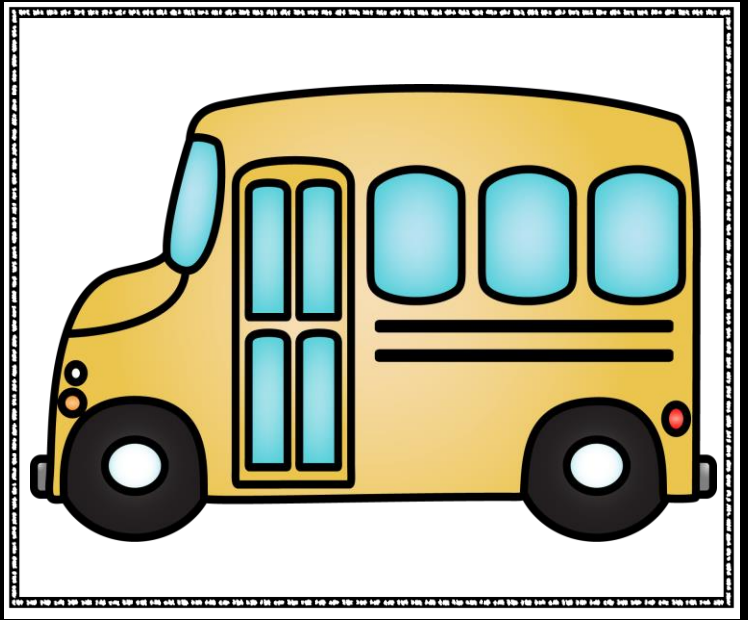

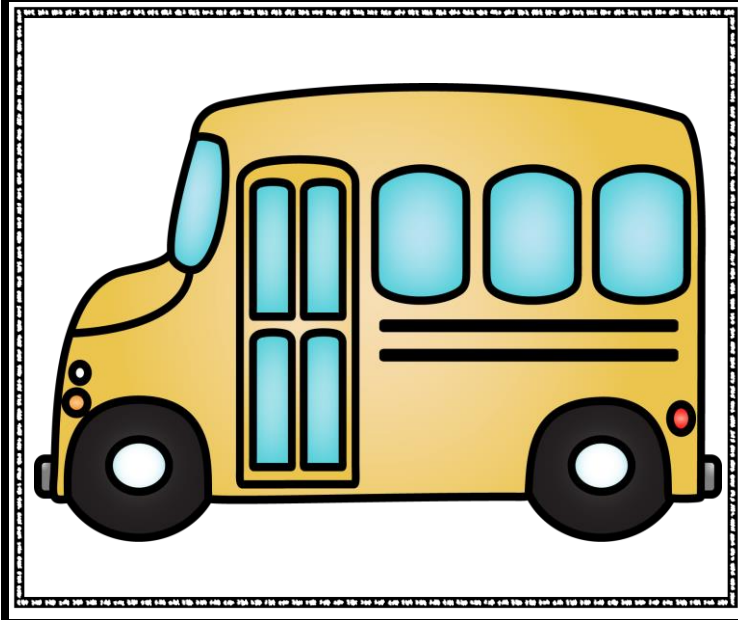

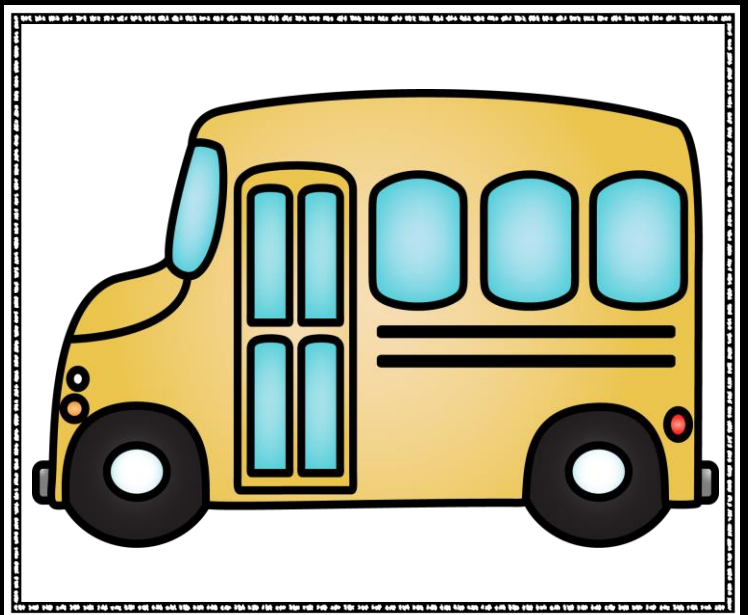

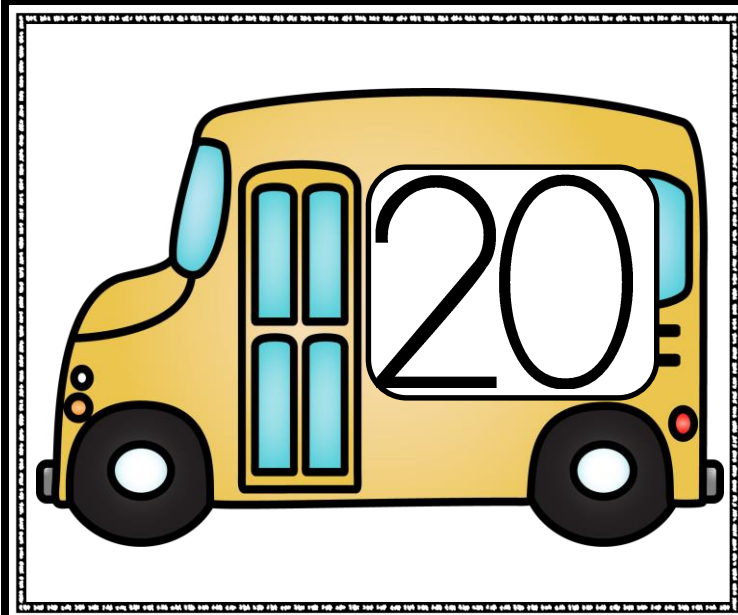

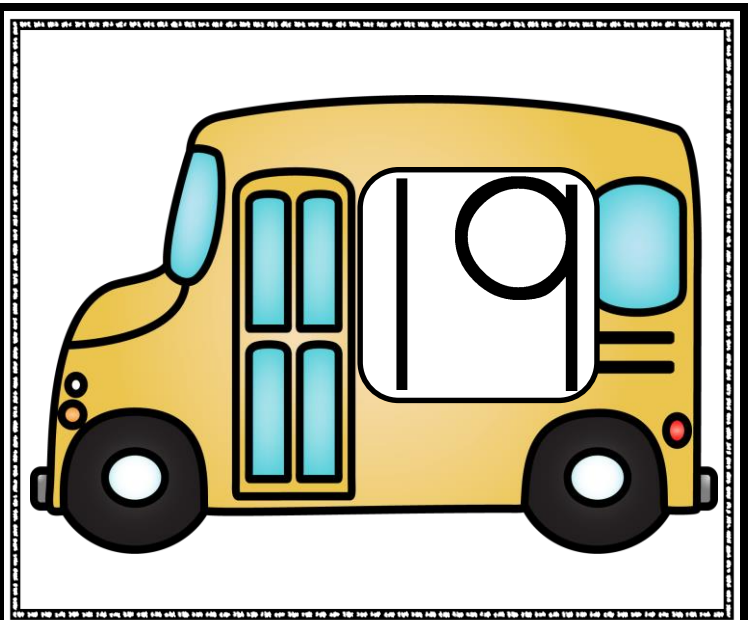

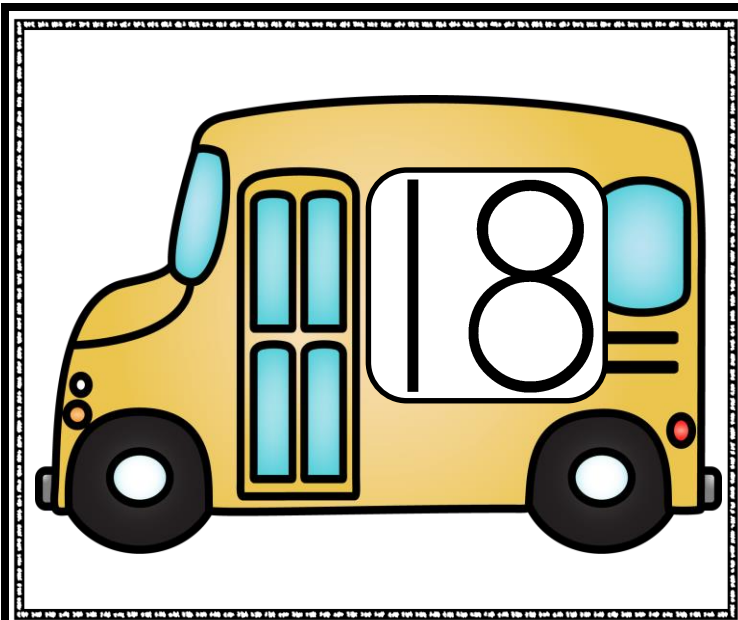

School bus number order cards for a center or small group activity— print on cardstock and cut out cards.

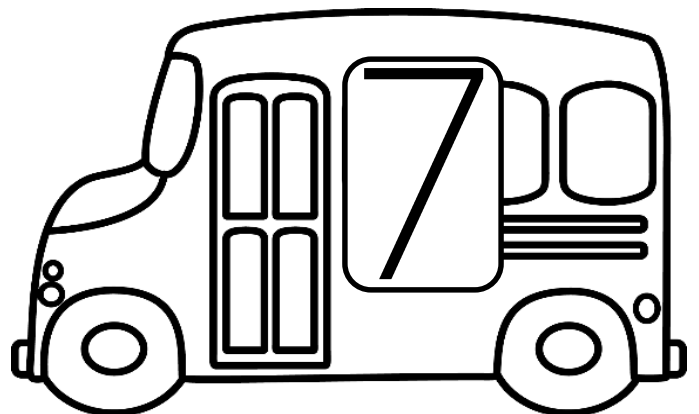

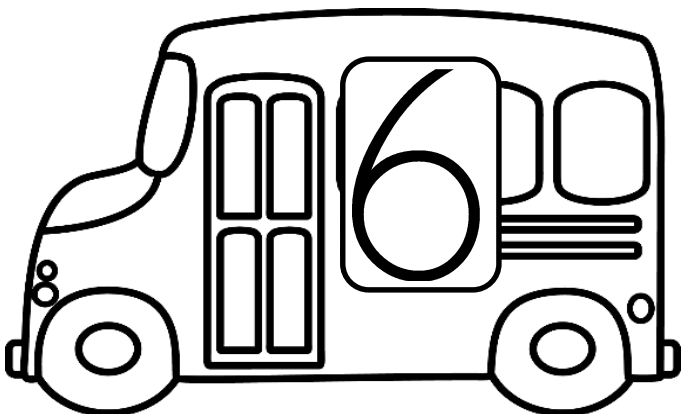

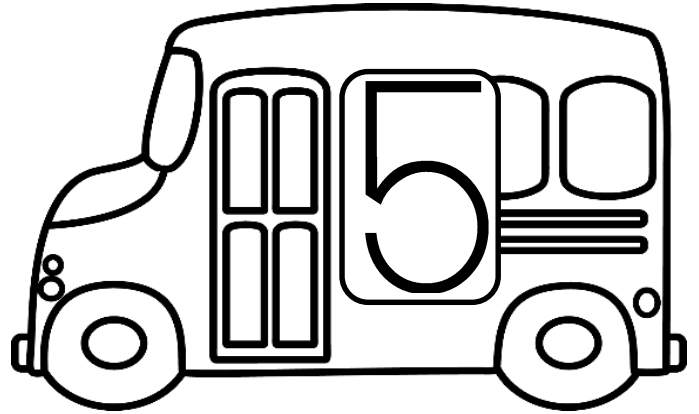

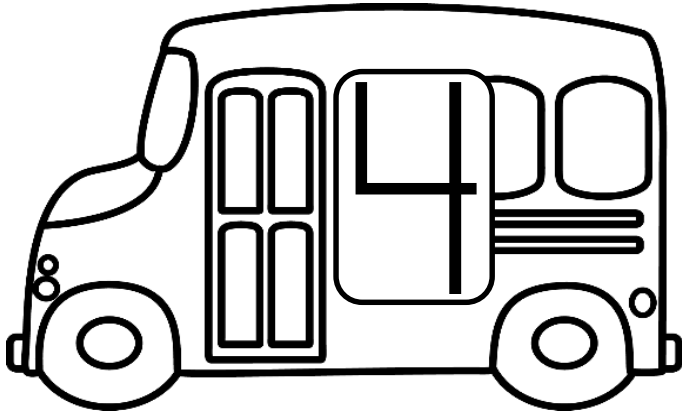

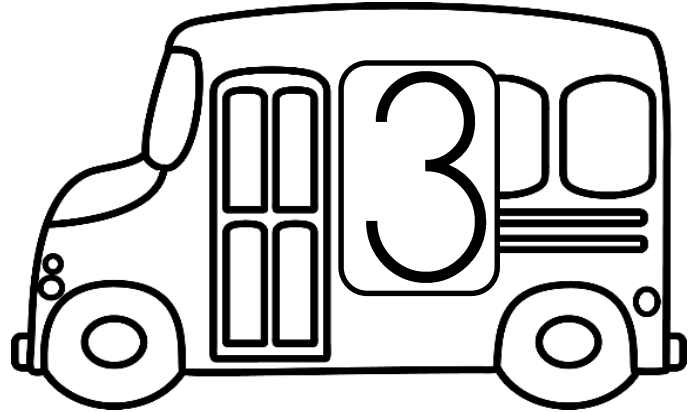

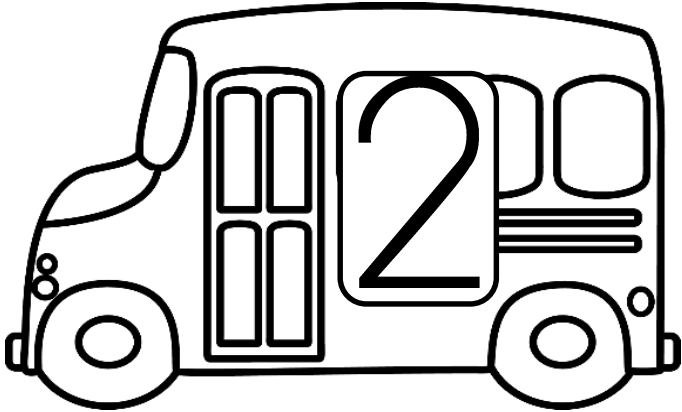

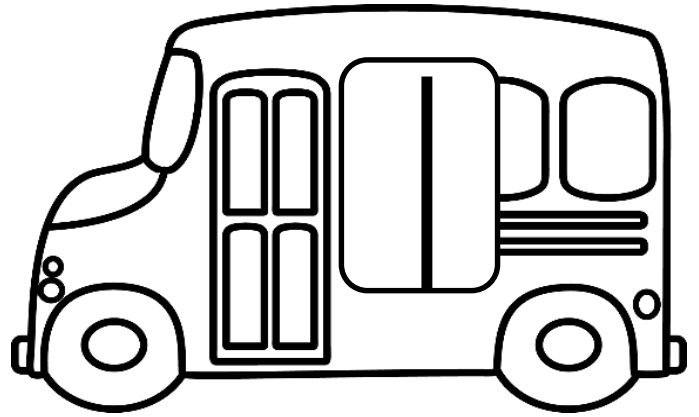

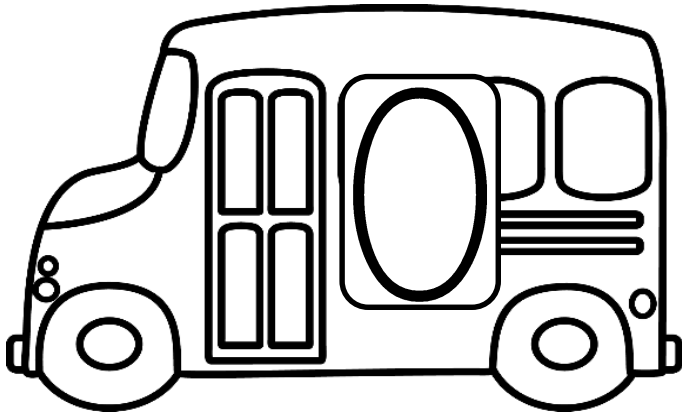

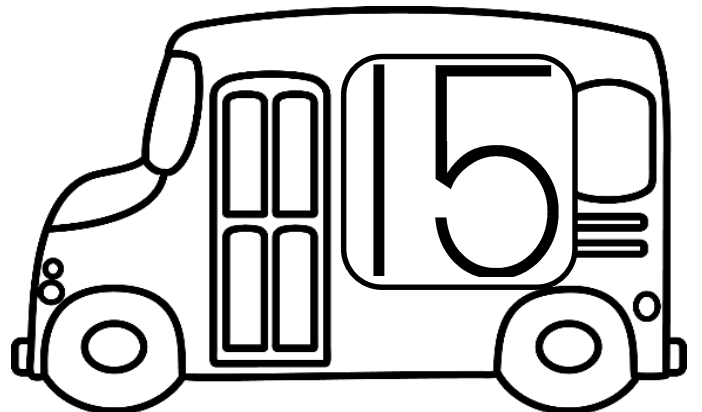

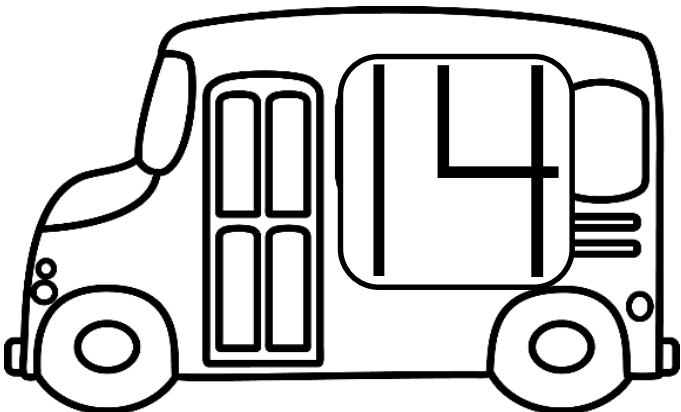

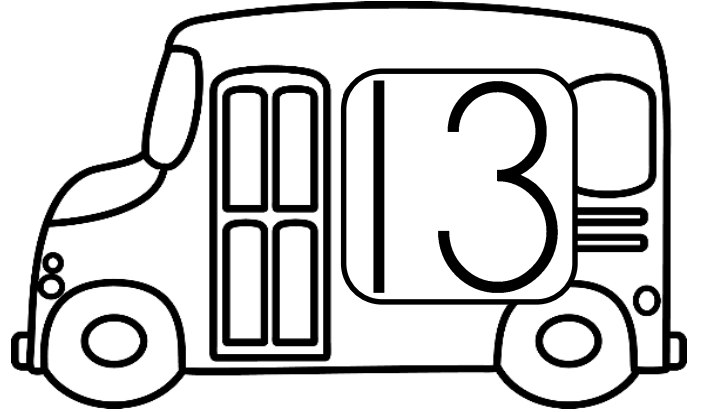

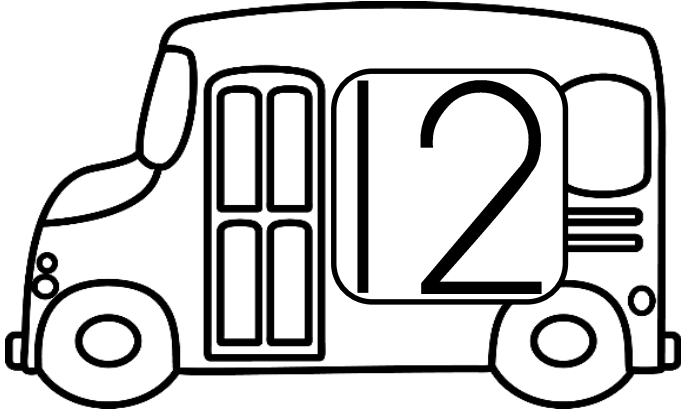

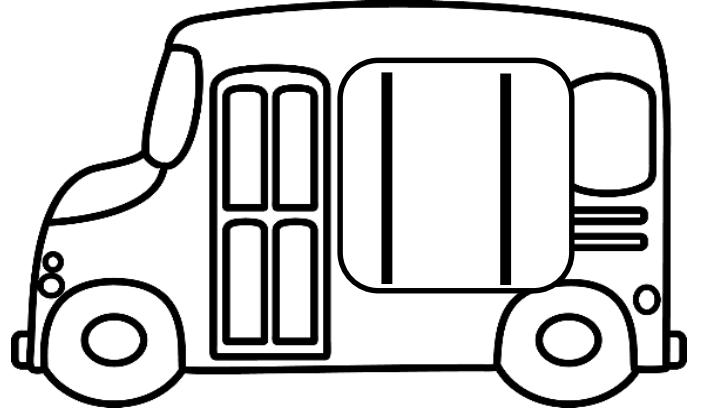

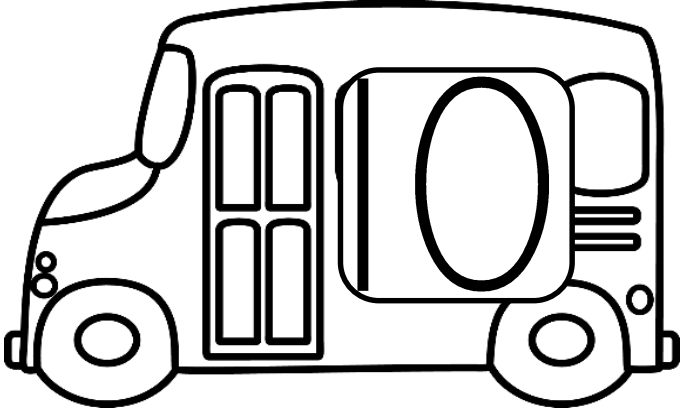

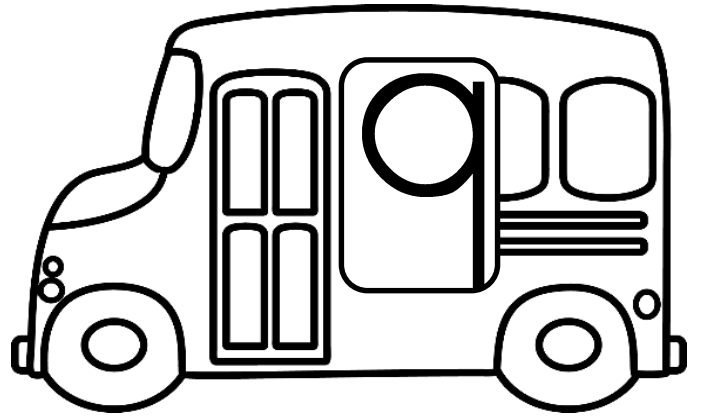

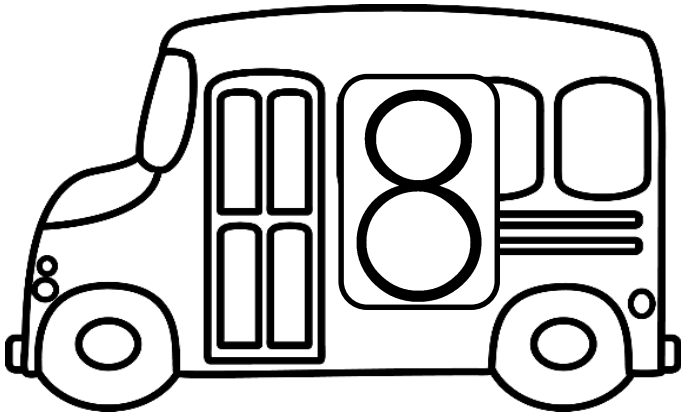

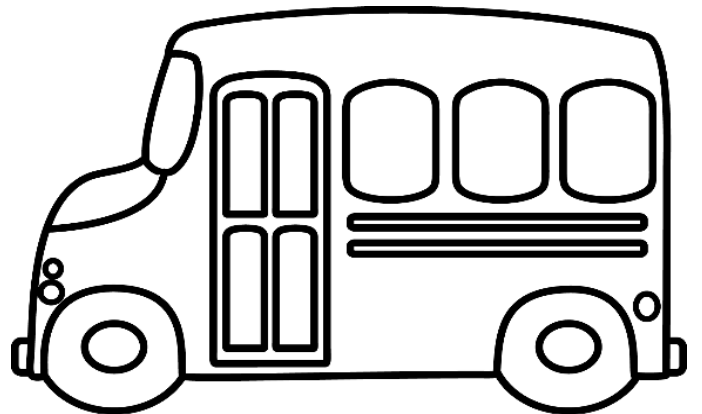

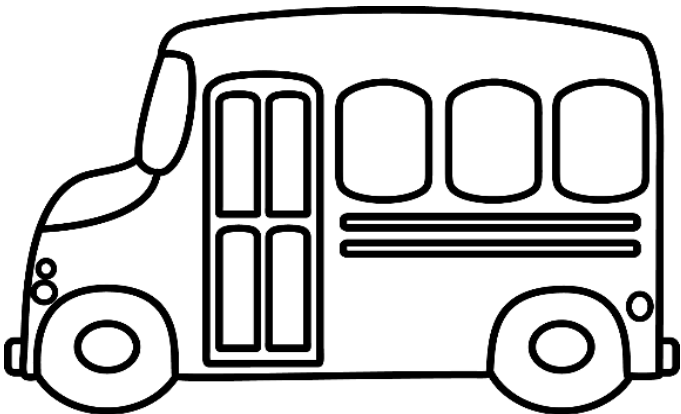

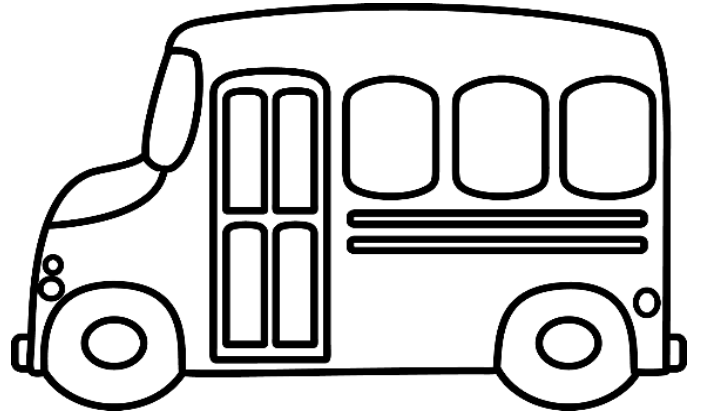

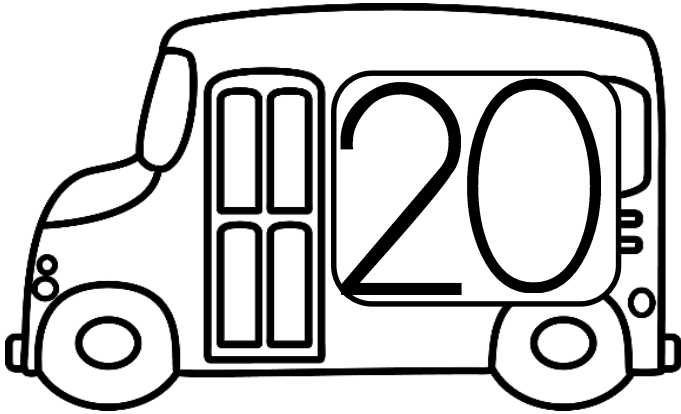

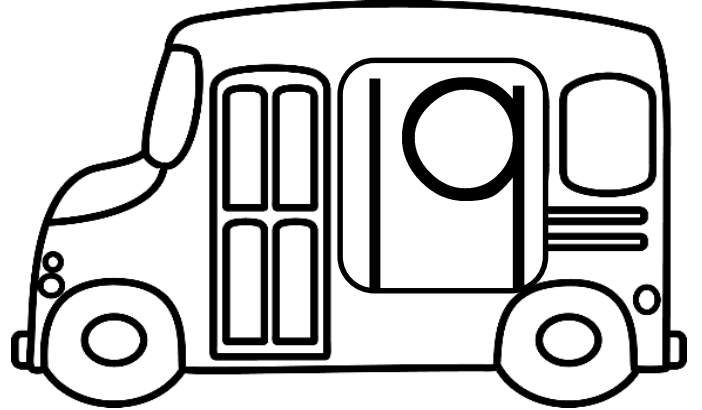

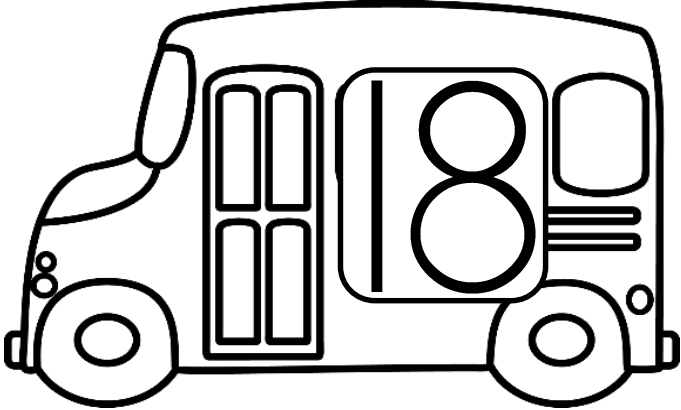

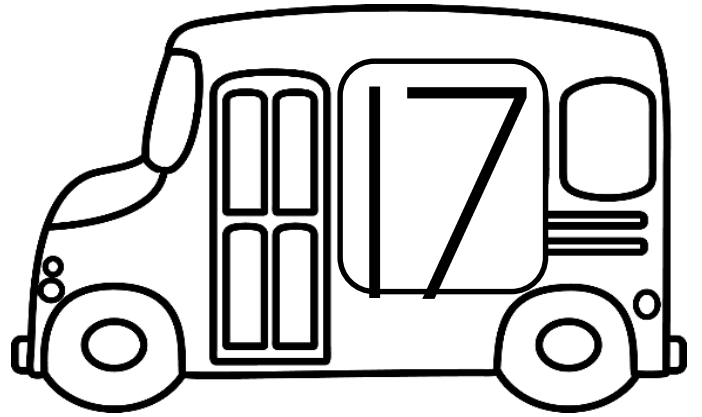

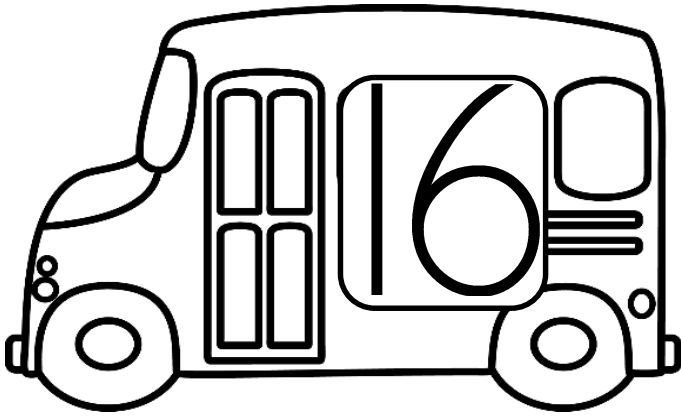

School bus number order cut and paste activity – children cut out buses and line up in numerical order on a construction paper strip.

Children can color and cut out school kids to add to their bus cut and paste activity if desired.

School Bus Counting 0-20

This is a set of school bus number cards 0-20 in color and b/w. Make a center, or use for a small group learning activity for preschool, pre-k and Kindergarten. Print on cardstock and cut out cards 0-20.

To follow up the lesson or center, create a cut and paste activity with the b/w buses - children cut out the buses and line up in numerical order on a construction paper strip. To differentiate, offer less buses.

To add another dimension and a focus for interest I have included 4 children who are ready to catch the bus to school. Children can color and cut out the school kids to add to their bus cut and paste activity if desired.
