

These bears are hibernating when it is cold.

Bears hibernate in the winter. Some bears hibernate in a cave.

Fold 2

Fold 1

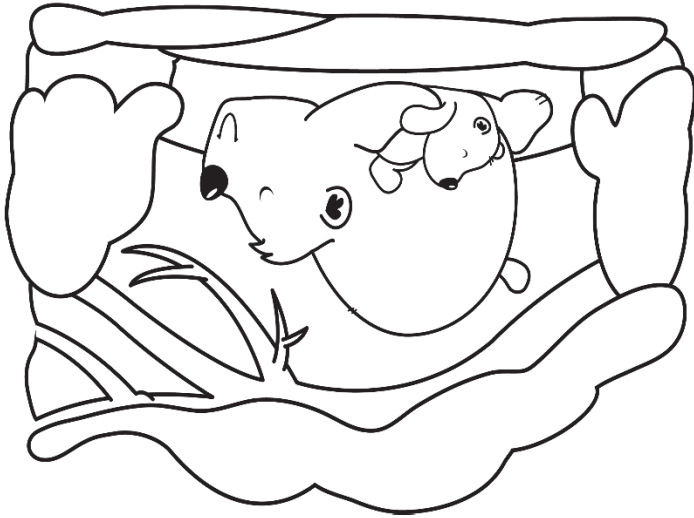

A hungry bear will want to eat a fish when it wakes up in the spring.

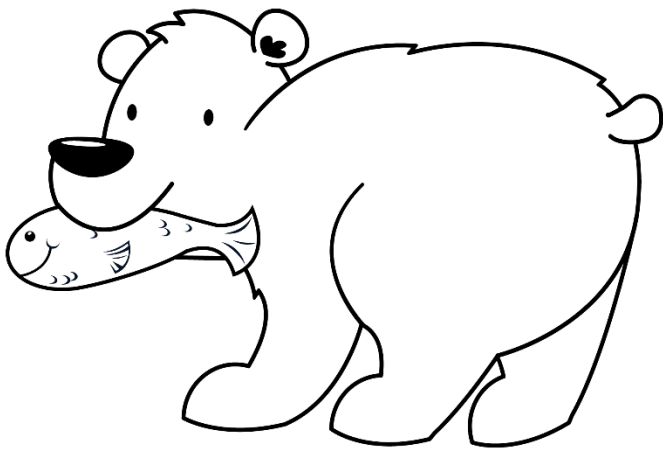

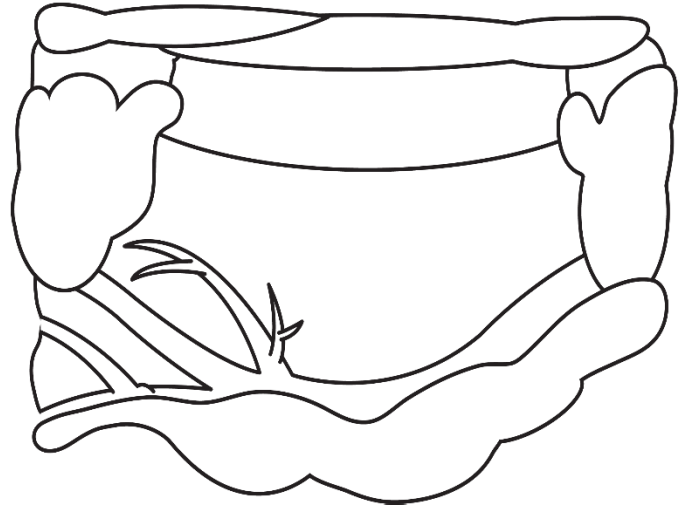

What does a BEAR do in the winter?

These bears are hibernating when it is cold.

Bears hibernate in the winter. Some bears hibernate in a cave den.

A hungry bear will want to eat a fish when it wakes up in the spring.

What does a BEAR do in the winter?

This is a foldable booklet in both color and b/w to use for your early learning Hibernation unit. The graphics are engaging to capture the interest of young children, but the science they are learning is very real!

This is a sample from my resource [Hibernating Animals – Activities for Early Learners](#). The hibernating animals featured are bear, bat, chipmunk, hedgehog, raccoon and snake. Includes • 12 foldable booklets featuring animals that hibernate in the winter, 6 in color, 6 in b/w • 6 cut and paste scenes - add animals to their hibernation environments • Finish the picture – children draw each animal in its hibernating environment. • 6 animal stick puppets – cut out and add a small craft stick for a handle. • 6 hibernation environment cards

I add FREE items often. Follow on TpT and Pinterest to get them as soon as they are listed.
