

Owls

NUMBER NECKLACES

Counting from 0-10

in Color and B/W

This is a fun number activity for early learners, featuring numbers from 0-10, and recognizing and ordering them.

Cut out the circled owls, and punch one or two holes at the top or center of each. If using one hole, the cards will bunch together, if using two, they will lie flat. The children can string them onto a piece of yarn with some tape wrapped tightly around one end, and a double knot at the other; or onto a shoelace.

The cut-outs can also be used to glue onto a construction paper headband, or onto a brown paper forked branch with a couple of fall leaves– these look great on a bulletin board display.

The activity is offered in both color and b/w.

If you need a number activity featuring owls that is a little more advanced than this one, take a look at KidSparkz' [Owls Number Necklaces Featuring 6 Different Forms That Numbers Can Take 1-10.](#)
